

learning today - leading tomorrow

Level 5 Management and Leadership

“Translating organisational strategy into effective day to day performance.”

Introduction

The Level 5 Management and Leadership qualification provides a unique opportunity for UK and International Businesses to transform their professional development programme. Encouraging middle managers and leaders to focus on translating organisational strategy into effective day to day performance, we provide the freedom and flexibility to design and/or align existing in-house training to create an accredited, bespoke and sustainable practitioner-led and evidence-based professional development programme.

Programme design and delivery

We do not specify prescriptive content or mode of delivery for this qualification and therefore Businesses are free to design their own programme content and use a mode of delivery that meets the needs of their employees, managers, leaders and stakeholders.

We work with individual Businesses to ensure that the content of the Business delivery plan meets the assessment criteria detailed within the qualification and then provide a direct route to accreditation.

The design and/or alignment of activities and/or existing programmes encourages and supports individual Businesses to focus on sustainable capacity building procedures to ensure their strategic plan, vision, goals and objectives can be met.
