

developing character - promoting values

Learning to Lead

What is the course?

Endorsed by the Royal Chartered Management Institute, 'Learning to Lead' consists of three, independent modules, each designed and specifically written for students.

In Module A, students are introduced to the idea that, throughout their lives, each of them must take responsibility for leading their personal development. The exploration of heroes, heroines, tyrants and tormentors helps to unravel the concepts of leadership. Working in groups and individually, students explore the character qualities and leadership skills they must develop if they are to be ready for their 'Big moment'.

The 21 units of Module B actively encourage personal development. Creating a vision, articulating goals, team leading and speech writing are just some of the practical sessions that mingle with an examination of further leadership skills. The units are punctuated with tasks that encourage reflection and review. By the time students reach the final unit they are in a position to monitor their progress and plan their next steps.

In Module C, we assume that students have accepted that our opening premise on leadership is true. Now is the time to learn about 'Being a good leader'. Students are encouraged to seek out opportunities in school, at home and in the community to further develop their skills.

What is the importance of the course?

There is a growing body of research highlighting how a consistent focus on teaching character qualities and leadership skills is directly linked to students being able to flourish at school, in the workplace, and in society.

What are the benefits of the course?

- Full course materials and FREE teacher training
- Teachers' notes, resources and lesson plans for every module
- Bronze, Silver and Gold certification as students progress through the programme
- Endorsement from awarding organisations and school leaders

What students say...

"This course gave me a different perspective on life - 'Carpe Diem' Seize the Day! The course showed me that it was possible for me to make a difference even at my age!"

"The course changed the way I perceive leadership. I thoroughly enjoyed the course and would recommend it to others."

"I can testify that the experience and new skills that I learned in the programme might have normally taken years to learn on my own. The structure, layout, language - everything is impeccably presented."

developing character - promoting values

Learning to Lead

Module A

- A1 Born to lead
